TABLE OF CONTENTS

Volume 161

ARTICLES

ANOSOVA, JOANNA P. and VICTOR V. ORLOV / The Binaries and Triple Systems in an Irregular Field 209
BEECH, MARTIN / Sensitivity in the Models of Massive Stars 133
DEYU, WANG, WU XINJI, and CHEN HAO / A Collective Radiation Mechanism for the Core Emission of Pulsars 271
EL-LABANY, S. K. and G. ROWLANDS / Oscillatory Nonlinear Electron Flow in a Pierce Diode Using Lagrange Transform 247
ELWAKIL, S. A., E. A. SAAD, M. T. ATTIA, and S. K. EL-LABANY / The Heat Flux Calculation for the Laser-Fusion Problem 35
EVREN, S. / Light Variations of RT Lac during the Last Ten Years 303
FUSHENG, CHEN / The Effects of the Tidal Force and Rotation on the Velocity of Stellar Wind 11
GIANUZZI, MARIA A. / Visual Binary Systems in the Solar Neighbourhood: A Question of their Separations 241
GUERRERO, G., M. BOSSI, and M. SCARDIA / Spectroscopic Observations of the Be Star ζ Tauri 27
HANUSCHIK, REINHARD W. / Stellar $v \sin i$ and Optical Emission Line Widths in Be Stars 61
HATZIKONSTANTINOU, P. / Magnetic and Viscous Effects on a Liquid Metal Flow due to a Rotating Disk 17
İBANOĞLU, C. / Extensive Photometric Study of V471 Tauri 221
JHA, BASANT KUMAR and RAVINDRA PRASAD / Effect of Magnetic Field on the Free-Convection and Mass Transfer Flow through a Porous Medium 195
KORCHAGIN, V. I. and A. D. RYABTSEV / Waves of Induced Star Formation in Galaxies 321
KOIJAM, MANIHAR SINGH / Slowly Rotating Perfect-Fluid Universes Coupled with Zero-Mass Scalar Field 111
LIU, XIAO-WEI and JIAN-SHENG CHEN / The Physical Properties of Primordial Intergalactic Gas – Re-Examination of Self-Gravitating Models of Lyman-Alpha Forest 47
MANCHANDA, R. K. / Variable Pulse Profile and the Accretion Geometry in GX 1+4 85
MARON, NAPOLEON / Properties of Circumstellar Grains in R Coronae Borealis 201
MOHANTY, G. and R. R. PATTANAIK / Cosmological Mass Model in General Relativity 253

TABLE OF CONTENTS

RADWAN, AHMED E. / Hydromagnetic Stability of a Gas-Liquid Interface of Coaxial Cylinders 279
SHIBATA, SHINPEI / A Numerical Method to determine the Electromagnetic Field of the Pulsar Magnetosphere with Inclined Magnetic Moment 145
SHIBATA, S. / Confirmation of Quiet Pulsar Model by the Boundary Element Method 187
SINGH, J. B. and D. D. DUBE / Self-Similar Power-Driven Isothermal Flows behind Cylindrical Shock in Magnetohydrodynamics 295
SINGH, MARKANDEY and JAI PRAKASH CHATURVEDI / Some Vibrational Bands of the $C - X$ System of V0 Molecule in the Umbral Spectrum of the Sun 233
SKALSKÝ, VLADIMÍR / Cosmological Member λ in the Light of Present Physical Conceptions 263
STEENMAN, H. and P. S. THÉ / Note on a Remarkable Object Close to the Star LSS 3027 75
STEENMAN, H. and P. S. THÉ / Studies on the Chamaeleon Star-Forming Region III. The Distance to the Dark Cloud and the Spectral Energy Distribution of HD 97048 and HD 97300 99
VENKATESWARLU, R. and D. R. K. REDDY / Vacuum Bianchi Type V and VI_0 Cosmological Models in a New Scalar-Tensor Theory of Gravitation 125
WALTER, K., P. G. NIARCHOS, and H. W. DUERBECK / Photometric Data and Analysis of the Light Curve of the W UMa-Variable ST IND 1

LETTERS TO THE EDITOR

BAYIN, SELÇUK Ş. / Comments on Slow Rotational Perturbations of Robertson–Walker Universes 351
GRABIŃSKA, T. / Definition of the Large-Scale Extinction – A New Solution of the Central Void Phenomenon 347
LESSNER, G. / Density Fluctuations in the Universe after the Recombination Period 175
LORENZ-PETZOLD, DIETER / On the Non-Existence of the Barrow-Deruelle-Bianchi Type-I Solution of No-Scale Supergravity 159
LORENZ-PETZOLD, DIETER / Comment on the Guzmán-Bianchi Type-VII_h Solutions 163
RAM, P. C. / Unsteady MHD Free-Convective Flow of a Viscous Rotating Fluid through a Porous Medium with Constant Heat Flux and Heat Generation 167
RAM, P. and D. D. DUBE / Self-Similar Flows behind M.H.D. Shock Waves 339
SAZHIN, S. S. / A Physical Model of Quasi-Electrostatic Whistler-Mode Propagation 171
SHANTHI, K. / Bianchi Type-VI_0 Vacuum Model in the General Scalar-Tensor Theory of Gravitation 335
VARMA, M. N. / Spatially Flat R-W Cosmological Model with Massive Scalar Field 181
VORÁČEK, PAVEL / The Zero Cosmological Constant and High Vacuum Energy Density 165
